

## Technical Specifications

<b>Max Delivery</b>	2.5 litres per minute
<b>Maximum Tip Size</b>	0.023" at high rotation 0.017" at low rotation
<b>Power*</b>	110v/120V 60Hz (3.3kva Transformer required)
<b>Max Pressure</b>	3140psi 220 bar
<b>Motor Type</b>	DC
<b>Motor spec</b>	0.75 hp 0.55kw
<b>Frame</b>	Telescopic Upright Frame
<b>Tyres</b>	Pneumatic
<b>Pressure Control</b>	Electronic
<b>Pressure gauges</b>	Digital & analogue

\*240v machine also available

### Construction

All wetted parts constructed in High Quality (AISI 316/303) chromed stainless steel and ceramic treated pumping rod; teflon four lipped "V" packings. Tungsten carbide balls and seats.

### Each machine comes complete with:

Pump, Gun, Hose (10m), Filters, Tip, Telescopic Cart, Toolkit.

### Large range of accessories available including:

Tips, Base, Pencil Filters, Manifold Filters, Extension Pieces, Hose, Angle Heads, Transformer 3.3kva, Piston Lubrication.

• Airless Spray Pump

ASTURO  
BAC175

# BAC175 Airless Spray Pump

For performance and awesome output the BAC175 Airless piston pump leads the field in value for money. A proud testament to Italian engineering, the strength of this machine is clearly visible and apparent in use.

**Through advanced technology and sheer robust design this machine is built to last, it 'lives' to pump paint and that it does, at an astonishing 2.5 litres per minute.**

## quality assurance

Asturo have designed and built spray equipment for 75 years in both the industrial and decorative market. Manufacturing to ISO9001 standards the company is committed to building a reputation of tough, reliable and powerful machines. Based in Milan, Italy, Asturo distribute from their state of the art factory to around the world.

## warranty and support

A one year back to base warranty comes as standard.

On going support is an essential part of supply, Spraystore offer service facilities, training facilities and use of the Spray Helpline. This line exists to offer advice on day to day use or to arrange servicing and accessories.

## training

Courses are held periodically for groups of 5-10 people to be instructed in the use of Airless equipment. These days are extremely useful for new users as they overcome the mystery that so often surrounds spray painting. In fact, you will soon realise how technology has made Airless equipment much easier to use.

## demonstrations

Demonstration days are held periodically. These events are an ideal way to appreciate the benefits of spray painting, the savings that can be made in your time and of course in your costs.

For the serious buyer we can offer personal demonstrations, these are restricted to those that have decided to purchase a machine but have not decided which model.

**Handgun**

Tip holder compatible with virtually all brands of tips

Safety Switch

Four finger ergonomic trigger

Pencil Filter

Digital Pressure Gauge PSI & Bar

Controls allow for choice of high or low rotation (depending of viscosity of material)

Ceramic treated pumping rod

Tungsten Carbide check balls and seats

Manifold Filter (part of triple filter system)

Telescopic Handle

Analogue Pressure Gauge

Pneumatic Tyres

Hose Assembly

Suction filter
