

HURRICANE

3 Stage HVLP Turbine Spray System

The Hurricane HVLP 3 is a heavy duty three-stage turbine sprayer ensuring no need for a heavy compressor. Portable, rugged and designed for professional use the Hurricane turbine complete with Accuspray HVLP spray gun gives a superior finish eliminating major overspray. Designed to spray at a low maximum pressure, the Hurricane works within legislation that prohibits the air atomisation of most solvent products at over 10 pounds per square inch (psi).

The combination of a British designed and built turbine with the finest American made gun for turbine HVLP applications produces a system that makes up to 40% savings on materials compared with conventional spray.

It gives a factory finish on every job and at its price, compares favourably with similar more expensive systems.

Let its power blow you away!

Technical Specifications

Turbine	3 stage
Power	110v or 240v AC
Max pressure	8 psi
Motor power	1500 watts
Pot size	1 quart (0.93 litres)
Hose length	8 metres

- Portable system
- 110v and 240v versions available
- Very low maintenance
- Low weight
- Quick release hose to gun attachment.

Capable of spraying most priming and finish coats:

- Laquers, Wood-Stains, Cellulose, Polyurethane enamels
