

AIRLESS PAINT SPRAYING SYSTEM

The entry level class for the professional trade

Pro 20

The Pro 20 piston pump –
the compact solution for small
Airless applications

- **Powerful**
For virtually any indoor application with Airless gun or internally fed paint roller and also for painting jobs.
- **Convenient**
Due to its user friendly details the Pro 20 is simple and convenient to use.
- **Light and compact**
Thanks to its compact dimensions and its low weight the Pro 20 is easily transported and ideal for any workshop or building site application.

Spray the **best surface finish** with the Airless gun AG 08. In combination with the Trade Tip 2 Fine Finish nozzles you can achieve first class surfaces.

The practical carrying handle provides for **convenient transport** on the building site.

The connection cable (6 m) provides **flexibility** and a wide radius of action.

Pro 20

The pressure gauge provides **precise information** on the set spraying pressure.

The flexible suction system allows **directly suction** from the original container.

The integral drip catcher allows the suction system to be **stored cleanly**. Practical for transport.
